

Conforma Clad[®] Protected Screw Elements

...extend the life screw elements up to 5 TIMES longer!!!

1 Maintain Critical Screw/ Barrel Clearances

Our cladding is metallurgically bonded to the base material of screw flights greater than 3/16", and manufactured to meet your specific barrel tolerances, resulting in improved process control.

2 Optimize Outputs & Physical Properties

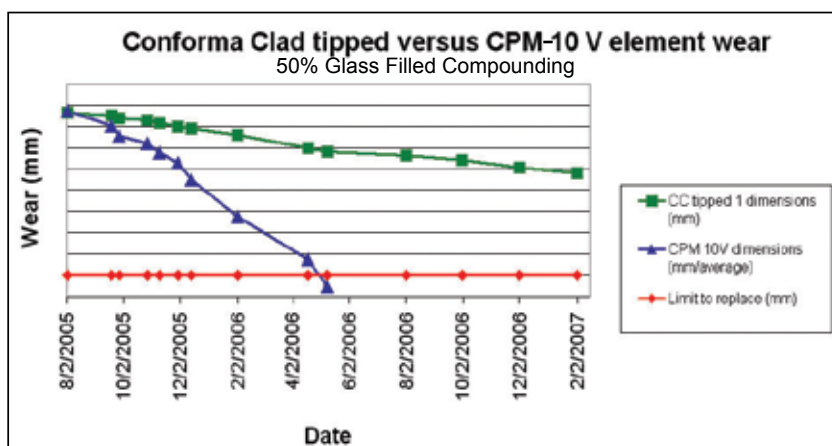

Maintaining screw/barrel clearance ensures consistent extruder performance, consistent shear rates, consistent extrudate temperatures, consistent physical properties.

3 Formulated Specifically For Use With WPR-29[®] Barrels

Maximize screw and barrel compatibility. Conforma Clad tipped screw elements are ideal for use with WPR-29 type barrels.

4 Available Thru OEMs & After Market Suppliers

Request Conforma Clad tipped screw elements from your OEM or contact Conforma Clad for a list of OEM providers!
